

Data Scientist

Location: Remote / Hybrid

Experience: 1–4 Years

Employment Type: Full-Time

About the Role

We are looking for a Data Scientist to analyze complex datasets, build predictive models, and generate actionable business insights.

Responsibilities

Clean and preprocess datasets; perform exploratory data analysis; engineer features; develop classification and regression models; evaluate model performance; create visualizations; communicate findings; build reproducible ML pipelines; collaborate with engineering teams.

Required Skills

Python, Pandas, NumPy, Scikit-learn, SQL, Statistics, Probability, Data Visualization, Machine Learning, Feature Engineering, Exploratory Data Analysis, Git.

Preferred Skills

PyTorch, TensorFlow, XGBoost, LightGBM, Matplotlib, Seaborn, Jupyter, MLflow, AWS, Spark.

Education

Bachelor's degree in Computer Science, Information Technology, AI, Data Science, or a related field.

Soft Skills

Analytical thinking, communication, curiosity, problem solving, business understanding, attention to detail.

Benefits

Remote work, flexible working hours, learning opportunities, performance bonus, paid time off, and a collaborative engineering culture.
