

Machine Learning / AI Engineer

Location: Remote / Hybrid

Experience: 2–5 Years

Employment Type: Full-Time

About the Role

We are looking for an ML/AI Engineer to design, develop, and deploy machine learning and AI-powered systems, including NLP, embeddings, semantic search, and LLM applications.

Responsibilities

Develop ML models; build preprocessing and feature engineering pipelines; develop NLP systems; create embedding and semantic-search pipelines; build RAG applications; integrate LLMs; evaluate models; optimize inference; deploy models through APIs; monitor production performance.

Required Skills

Python, Machine Learning, Scikit-learn, NumPy, Pandas, NLP, Feature Engineering, Model Evaluation, REST APIs, Git, SQL.

Preferred Skills

PyTorch, TensorFlow, Hugging Face, Transformers, LangChain, LangGraph, RAG, Vector Databases, FAISS, ChromaDB, LLMs, Embeddings, Docker, FastAPI, AWS.

Education

Bachelor's degree in Computer Science, Information Technology, AI, Data Science, or a related field.

Soft Skills

Research mindset, analytical thinking, experimentation, problem solving, communication, independent learning.

Benefits

Remote work, flexible working hours, learning opportunities, performance bonus, paid time off, and a collaborative engineering culture.
